Foam Glass Sound Absorbing Board

1, introduction: The sound absorption foam glass plate is made of glass raw material, scientifically prepared, and then roasted by high temperature, It is a new type of sound insulation and sound absorption material. Its main function is to reduce the reflected sound and reverberation sound, shorten and control the reverberation time. The product is resistant to high temperature, does not burn in case of fire, has no harmful volatiles, is non-toxic and tasteless, has good chemical stability, is not weathered, not aged, not moth eaten, not moldy

2, Product performance parameters

ITEM	UNIT	TECHNICAL INDEX
Sound absorption coefficient		125HZ 0.21
		500HZ 0.33
		1000HZ 0.45
		2000HZ 0.48
		4000HZ 0.60
B.D	Kg/m3	170-220
Porosity	%	90
Compressive strength	Mpa	≥0.7
Open hole bubble	%	>50
Flammability		Flame retardant, non combustible
Corrosion resistance		Acid resistant (except hydrofluoric acid), not weathering and aging

3,Features:

ZIBO JINGGAN REFRACTORY IMPORT AND EXPORT CO.,LTD

- 1) The results show that the product has more than 50% open hole bubbles and more than 90% porosity
- 2) Environmental protection material, no formaldehyde, no harmful substance release
- 3) The product color is various, beautifies the environment, the decoration effect is beautiful, comfortable
- 4) Non combustible, fire rating a
- 5) It is resistant to insect bite and corrosion
- 6) Not weathering, aging, durable
4. Application: large conference hall, exhibition hall, subway, waiting hall, recording room, TV hall, etc
- 5, Good feedback of product use effect, the products have been exported to South Korea, Japan, Pakistan
- 6, We are a professional supplier, who can provide customers with free product technology, use and other issues

Do you want to find a professional supplier of refractory products?

Do you want to find a professional supplier of graphite electrodes?

Do you want to find a stable and credible supplier?

Then let's contact with jinggan company
